

Psyche Clinical Psychology: Editorial Plan and Implementation Strategy

For: Percy only. Not for the client. No bid placed, nothing sent.

Date: 8 October 2026 (bidding on Freelancer project 40745684 closes about 9 October).

Reference point: the live demo at <https://apps-cheap-initially-standard.trycloudflare.com/>, which is the same file as the saved Psyche_Clinical_Psychology_Static_Demo_2026-10-03.html. This document does not change that file.

Rules for both parts. Do not invent anything about the client. Where her material is needed, use a marked slot such as [Client copy: clinician bio] or [Not supplied: session fee]. Any headings, button labels and form labels written by us are marked *proposed*. No public booking calendar. No practice software is built. Her booking system is not named in the brief, so we do not name one.

Part 1. Editorial plan: what needs to change

1.1 The three gaps

Gap	Live demo now	Change to
Colours	Black page, black top bar, white text, cream #e7dcc8 accents, dark #141210 content box	Deep navy, gold and light neutrals. Light or white content box on a light background, dark navy text. Exact hex values come from her brand files. Provisional demo values: navy #1F2A44, gold #B08D57, light neutral #F7F4EE (labelled provisional)
Platform	One static HTML file (about 1.6 MB, photos embedded, no script)	An editable mainstream CMS such as WordPress or Webflow. The static demo stays as the design preview only
Forms	One disabled form on Contact, with a dropdown for Individual therapy or REGULATE	Three enquiry forms: Individual Therapy, REGULATE and general. Spam protection noted. Disabled in the demo

1.2 What stays

- Sticky top bar. Only the bar sticks on scroll, nothing else.
- Faded Adelaide landmark photo behind each page, with a content box on top and credits on the page. The box turns light.
- Six pages: Home, About, Individual Therapy, REGULATE, Fees & FAQs, Contact.
- Enquiry instead of a public calendar.
- Crisis line in ordinary readable type: "This is not a crisis service. If you are in danger, call 000. Lifeline is 13 11 14." (proposed wording)
- Demo marking ("Static demo. Not a live practice site.") and the "not supplied" marking.
- No invented details, no people in photos, no testimonials.

1.3 Other changes, measured against the demo

Area	Live demo now	Change to	Why
Navigation	Home, About, Work, Fees, Contact. Individual and REGULATE are reached from "Work"	Home, About, Therapy (small dropdown: Individual Therapy, REGULATE), Fees & FAQs, Contact, plus one Enquire button. Alternative: six flat items. Percy decides	Brief names the pages; "Work" is not a term she uses
Page structure	Every page is a closed open-and-close section, and Home has five more inside it	Pages show open. Keep open-and-close only for FAQs	Too many expandables hide the content

Area	Live demo now	Change to	Why
First screen	Three questions: how to book, mission, how to contact. Practice name and "Adelaide" in the faded centre	Practice name (her logo slot), one short line [Client copy: home intro], one Enquire button, crisis line	Matches how local practice sites open; tasteful call to action
Extra blocks	Unnamed intro block, "Implementation" and "Editorial" notes visible on the page	Remove from the visitor view. Keep the notes in this plan	They are working notes, not site content
Body copy	Percy's own limits-first sentences (not her copy)	Replace with marked slots for her copy. Option: keep a few lines as visible placeholders, marked "Placeholder, not client copy". Percy decides	She already has most of her copy
Fees	Table inside an expandable, all amounts "Not supplied"	Own page, table visible, slots: [Not supplied: session fee], [Not supplied: REGULATE fee], [Not supplied: cancellation policy], [Not supplied: rebate details]. FAQs below as expandables	Brief asks for Fees & FAQs as one page
Photos	Seven Creative Commons Adelaide landmarks	Keep for the demo, labelled demo-only. Live site uses [Client photo: ...] slots. Percy decides whether to keep them in the bid demo	She has her own photography
Type	18px body, h1 32px, Newsreader and Source Sans 3	Keep about 16–18px body; larger headings (h1 about 40px, h2 about 28px). Her brand fonts replace these if supplied	Larger heading contrast reads as more premium
SEO	One generic page title, no meta description, no alt text	Per-page title and meta description templates; alt text on every image (see 1.4)	Brief lists basic SEO as essential

1.4 Page-by-page content

All headings and labels below are *proposed*. Everything in square brackets is her material or not supplied.

Page	Sections in order	Call to action	SEO template (title / meta)
Home	Logo slot; [Client copy: home intro]; two short cards for Individual Therapy and REGULATE [Client copy: one-line summaries]; [Client copy: approach]; crisis line	"Make an enquiry"	"Psyche Clinical Psychology, Adelaide" / [Client copy: one-sentence practice description]
About	[Client copy: clinician bio]; [Client photo: clinician portrait, if she wants one]; [Client copy: approach to therapy]; [Client copy: registration details she wants shown]	"Make an enquiry"	"About · Psyche Clinical Psychology" / [Client copy]
Individual Therapy	[Client copy: what it is, who it suits, what to expect]; [Not supplied: session length]; Individual Therapy enquiry form	"Send an enquiry"	"Individual Therapy · Psyche Clinical Psychology, Adelaide" / [Client copy]
REGULATE	[Client copy: program overview, DBT as she describes it]; [Not supplied: format, length, group size, facilitator, dates, fee]; REGULATE enquiry form	"Ask about REGULATE"	"REGULATE DBT Group Program · Psyche Clinical Psychology" / [Client copy]
Fees & FAQs	Fee table with slots (1.3); [Client copy: FAQs] as expandables; "Is this a crisis service?" answered with 000 and Lifeline 13 11 14	"Make an enquiry"	"Fees & FAQs · Psyche Clinical Psychology" / [Client copy]

Page	Sections in order	Call to action	SEO template (title / meta)
Contact	[Not supplied: phone], [Not supplied: email], [Not supplied: address], [Not supplied: hours]; general enquiry form; crisis line set apart from normal contact	"Send"	"Contact · Psyche Clinical Psychology, Adelaide" / [Client copy]

Alt-text pattern. Describe what is in the photo in plain words, no claims. Demo: "Faded photo of [landmark], Adelaide". Live site: [Client photo: description she approves].

Form fields (proposed labels). No clinical questions. Same base on all three forms:

- Name (required)
- Email (required)
- Phone (optional)
- Preferred contact method (email / phone, optional)
- Message, short and optional, with the hint: "A few lines is enough. Please don't include detailed health information."
- Consent checkbox: "I agree to the practice storing these details to reply to my enquiry. [Client copy: link to privacy policy]"
- Note above the button: "This form is not monitored for emergencies. Sending it does not book a session."

Differences: the REGULATE form adds "Which intake are you asking about?" only if she supplies dates [Not supplied: intake dates]. The general form adds a "Subject" field (General question / Referral / Other). The demo forms stay disabled.

1.5 Voice, and what to ask her for once awarded

Voice: warm, calm, clinically professional, plain. Short sentences. No clichés, no promises of outcomes, no stock photos of smiling people. It is her voice, so our text stays structural.

Request list: logo files (SVG and PNG); brand hex values and fonts; copy for each page; photos with permission to use; fees, cancellation and rebate wording; phone, email, address, hours; name of her booking or practice-management system; registration details she wants shown; privacy policy; who receives each form.

Part 2. Implementation strategy: how and in what order

Fleet rule for every step: one writer edits the file, a tester checks it, then it is packed and saved. Nothing is deployed to production. The 3 October file is kept untouched; each rebuild is a new dated file.

Phase 1. Visual rebuild of the demo (before the bid)

Step	Work	Depends on
1	Colours: navy, gold and light neutral (provisional values); light content box and light page background; keep faded photo behind the box with a lighter veil	—
2	Sticky bar: navy bar, practice name left, nav with Therapy dropdown (or six flat), gold-outlined Enquire button. Only the bar sticks	1
3	Structure: pages open by default; only FAQs expandable; remove intro, Implementation and Editorial blocks from view	2
4	Content: swap body text for marked slots (per Percy's decision in 1.3); fee table with slots; crisis line on every page and in the footer	3

Step	Work	Depends on
5	Forms: three disabled forms with the fields in 1.4	3
6	Mobile check: bar collapses to a menu button, dropdown works by tap, text readable at 16px, contrast checked (navy on light and white on navy pass WCAG AA; gold used for lines and accents, not small body text)	1-5
7	Test, then pack and save as a new dated file	6
8	Refresh the public demo link to the new file	7

Phase 2. After it looks right (still demo only)

Only once Phase 1 passes testing:

1. SEO: page title and meta description per page from the templates; alt text on every image.
2. Spam protection: a visible note on each form (honeypot field plus a CAPTCHA service such as Cloudflare Turnstile or reCAPTCHA on the live site). Nothing active in the demo.
3. Booking-integration note: the live site can link to or embed her existing booking system once she names it. No public calendar. No software built.
4. CMS bridge note: one line in the demo footer: "Design preview only. The live site would be built in an editable CMS." Then test, pack, save, refresh link.

Phase 3. Real build (only if she awards the job)

Step	Work	Depends on
1	Collect her material (request list in 1.5)	Award
2	Confirm CMS. Percy's lean: WordPress (she can self-edit, mature form and spam plugins, many booking systems offer a WordPress embed, she owns hosting and files outright). Webflow is a fair alternative (clean visual editor, native forms with spam filtering) but adds an ongoing plan cost and is less portable. Percy's decision	1
3	Set up the theme or template (a lightweight block theme or a Webflow template), apply her brand values and fonts	2
4	Port the demo layout: sticky bar, faded photo behind content box, six pages	3
5	Build three forms (forms plugin or native forms) with honeypot plus CAPTCHA service; route to her email	4
6	Place her copy and photos; replace every slot; check none remain	4, 1
7	Booking link or embed path for her named system	6
8	SEO plugin or settings: titles, meta descriptions, alt text, sitemap	6
9	Performance: compressed images, minimal plugins, caching; mobile test	6-8
10	Handover: short update guide (edit a page, change a fee, swap a photo, read form entries); transfer domain, hosting and admin ownership to her	9

Before the bid closes (about one day): Phase 1 is realistic. Phase 2 notes are a stretch goal. Phase 3 is described in the bid, not started.
